Foundation's Board Letter

Dear collaborators, partners, donors and volunteers,

Due to the ongoing crisis caused by the pandemic, throughout 2021 we have focused our efforts on the most disadvantaged child populations and have strived to support as many projects as possible.

We have continued to support the 11 ongoing projects from 2020 in collaboration with Asociación ISTEa, Fundación Ictus, Fundación África Digna, Asociación Babies Uganda, Fundación IBO, Fundación Recover, Fundación Guné, ONGD Juan Ciudad, Asociación SILO and Asociación Amantaní.

In addition, we launched 10 new projects: 6 in the areas of health and nutrition, and 4 in education and infrastructure across Spain, Africa, Latin America and Asia, benefiting approximately 2,900 children.

We would like to say THANK YOU to all of you. Without your donations and support, these projects would not have been possible.

With our warmest wishes,

Nuria García Foundation's Board

Equine Therapy Programme for Children with ASD

Baix Llobregat

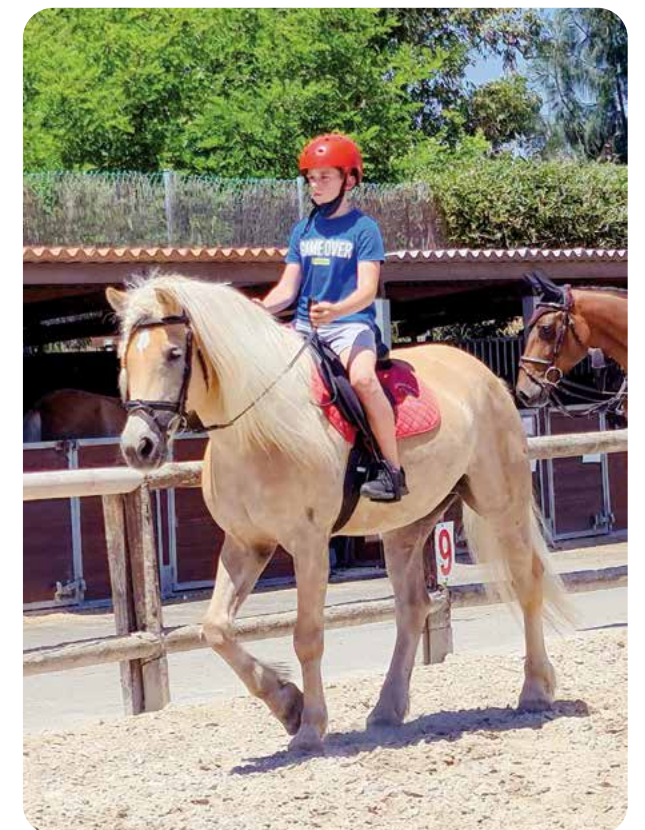

With ISTEA Association

For the second consecutive year, we have funded this project in collaboration with the ISTEA Association, which was created and endorsed by a group of psychologists specialising in ASD who volunteer their time with the organisation. Our aim is to respond to the needs of families with children diagnosed with ASD, encouraging awareness and participation.

This programme was carried out during the 2021–2022 school year, with 394 equine-assisted therapy sessions

involving recreational activities that support the integration of the children. The goal is to provide them with tools that enable positive development. This year, 49 children aged between 4 and 18 with autism spectrum disorder have benefited from the initiative.

Many of the families with children affected by this condition live in precarious situations and lack the resources needed to provide them with specialised education.

Contribution: 7.200€ + 2nd phase 2022: 4.800€

Spain

Providing food to the Solidarity Commissary

Barcelona

With Roure Foundation

Many families have been economically affected in the long term due to the pandemic. Social services have been unable to meet the growing need for food donations because of the rising number of families living in precarious conditions, including single-parent households and families where both parents are unemployed or without work.

Fundació Roure, an organisation rooted in the Old Town of Barcelona, addresses the basic needs of the elderly and families.

It provides personalised, comprehensive care to support their autonomy and promotes the inclusion of individuals within the community network.

This year, we are once again supporting the work of this foundation by funding the purchase of dairy products to cover more than three months, ensuring the continuity of the Solidarity Grocery Programme and helping to prevent malnutrition and undernourishment among 340 children aged 0 to 16.

Contribution: 2.000€

Spain

Social care for children from single-mother families

Barcelona

With Teresa Gallifa Foundation

Forty-nine per cent of single-mother families struggle to make ends meet, a situation that has worsened since the pandemic and increases proportionally with the number of children. Some of these women come from backgrounds involving violence and require comprehensive support, including legal advice and emotional counselling.

Together with the Teresa Gallifa Foundation, we work towards the social inclusion of pregnant women and single mothers so

they can experience motherhood with the support they need.

Through this project, the basic needs of 50 children in situations of extreme vulnerability have been met. The assistance includes infant formula, cereals and purées, nappies, hygiene products, vaccines not covered by the national health system but recommended by the Spanish Paediatric Association, and other essential items for the care of these children.

Contribution: 2.500€ + 2nd phase 2022: 2.500€

Africa

Nutrition and education of shepherd children

Kenya

With Africa Digna Foundation

For the fifth consecutive year, we have supported the programme “Lchekuti, Child Shepherds” in northern Kenya, in collaboration with the África Digna Foundation. This project promotes a dignified life for children aged 6 to 16 through impactful educational and nutritional interventions in the Samburu communities of Barsaloi, Lodokume, Lowa, Lulu, Mabati, Nairimirimo, Opiroi and Raraiti.

For these communities, livestock herding is the main economic activity. As these child shepherds spend their entire day

working, they have no opportunity to attend school and rely solely on milk and tea for nourishment. As a result, they are children who cannot read or write, face a high risk of social exclusion, and suffer from significant malnutrition.

We have succeeded in ensuring that the child shepherds of Kenya receive two hours of education each weekday, along with a balanced meal at the end of each day's lessons. Our support spans two school years, until 2022, across four different centres, and will benefit around 280 children.

Contribution: 7.200€ + 2nd phase 2022: 10.800€

Africa

Fight against maternal and child malnutrition

Mozambique

With IBO Foundation

Limited access to food and widespread food insecurity in Mozambique are key barriers to local development. In April 2019, Cyclone Kenneth struck the coastal region of Cabo Delgado province, directly impacting Ibo Island, Mozambique. Schools, healthcare centres and basic infrastructure suffered severe damage, as did the homes of thousands of residents.

Currently, 67,500 children are facing food insecurity and are at risk of life-threatening diseases such as malaria and typhoid.

This year, we have continued working with

the Ibo Nutritional Support Centre (CANI), with the goal of combating maternal and child malnutrition and addressing its causes and consequences over a 12-month period.

We aim to contribute to the socio-economic development of Ibo and to improve the precarious situation faced by its inhabitants. We will support approximately 300 children under the age of five, along with 200 mothers and pregnant women.

Contribution: 3.390€ + 2nd phase 2022: 4.689€

Africa

Prevention and treatment against malaria

Cameroon

With Recover Foundation

In 2021, we continued our collaboration with the Recover Foundation on the malaria prevention and treatment programme in Cameroon, which aims to diagnose and treat malaria among children in eight school centres.

According to the World Health Organization, half of the world's population is at risk of contracting malaria, but in Cameroon the risk is over 80 per cent. The most affected groups are children and pregnant women, as malaria is a leading

cause of miscarriage, premature births and high neonatal mortality rates.

The project funded diagnostic testing, hospitalisation costs for severe cases, and treatment for malaria in 970 children in the region. It also included the distribution of mosquito nets to families in urgent need.

Contribution: 9.014€

Africa

Expansion of the inclusive school in Monze

Zambia

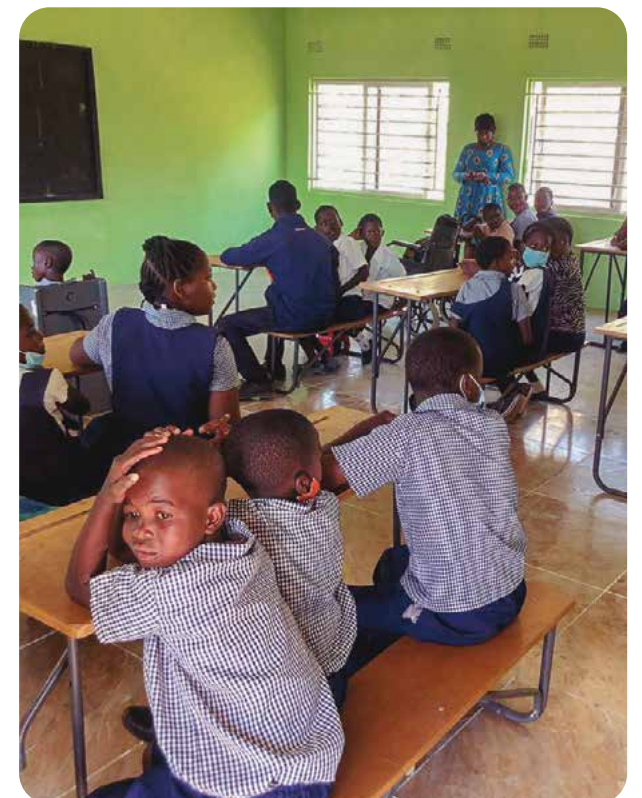

With Juan Ciudad NGDO

Eighty-six per cent of the population in Zambia lives below the poverty line. It is essential to provide a decent standard of health and social well-being to people living in disadvantaged regions of the world who lack access to basic services such as education.

Since 2019, the Nuria García Foundation has been supporting the construction of the first inclusive school in Monze, Zambia, in partnership with Juan Ciudad ONGD. The ultimate goal of this project has been the development of 12 classrooms equipped

with an inclusive education programme. We have previously participated in the construction of 3 of these classrooms, as well as a library with capacity for 200 children.

In 2021, we completed our final contribution to this project, which was dedicated to building the kitchen and toilet facilities. These areas have been essential to ensure that pupils enjoy decent living and learning conditions. Thanks to the improvements made, 3,200 children will now be able to attend school!

Contribution: 6.531€

Africa

Construction and equipment of Kikaya School

Uganda

With Babies Uganda Association

In 2018, we supported the construction of Kikaya School in the Wakiso area in collaboration with the Babies Uganda Association. The school opened in 2019 with 164 children, 34 of whom were boarders. By 2020, the new school year began with 300 children, including 120 boarders, which led us to build a new dormitory due to the school's growing success. This year, the demand for places at Kikaya School has been so high that we have decided to expand the school's

capacity with a new building, which will include four classrooms, doubling its current intake.

Education is the most powerful tool to fight poverty and inequality, and it is essential to equip the school with the best possible resources. The increase in pupil numbers must go hand in hand with the expansion of facilities and teaching staff in order to provide quality education to as many vulnerable children as possible.

Contribution: 8.124€ + 2nd phase 2022: 19.404€

Africa

Improvements in infrastructure, nutrition and health

Kenya

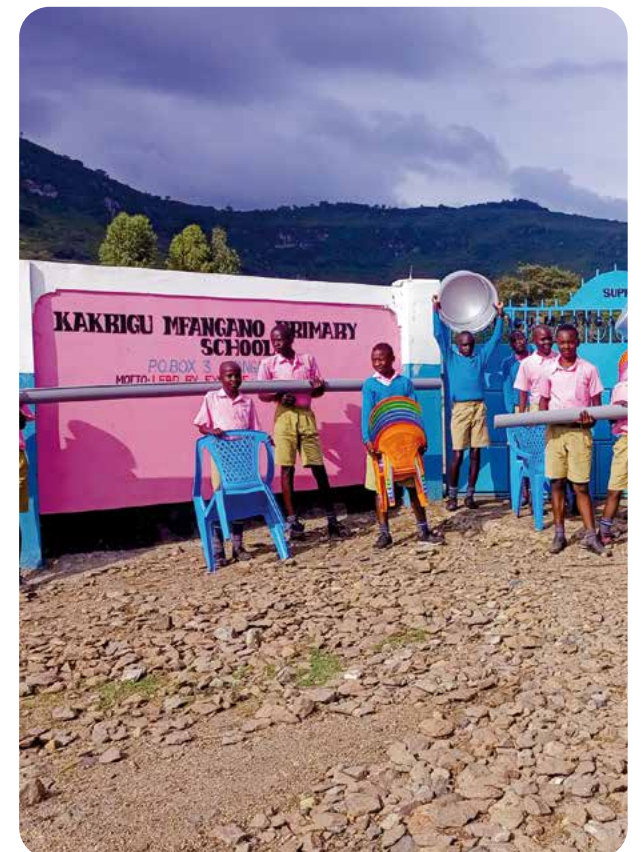

With Kakrigu Primary School

Kakrigu Primary School is located in Mfangano, an island on Lake Victoria in Kenya.

In 2016, it received our full support to fund infrastructure improvements and ensure access to education for 350 primary-level children. The pandemic crisis in Kenya has led to food shortages and a lack of sanitary resources. One of the most serious issues has been the lack of personal hygiene products for children,

resulting in a rise in various infections.

This year, our contribution has been directed towards improving infrastructure, nutrition and health conditions for those affected, including the installation of a new water tank, provision of kitchen utensils, food supplies, and hygiene products for the children.

Contribution: 2.500€

Africa

Improving the Gambasse school

Guinea-Bissau

With SILO Association

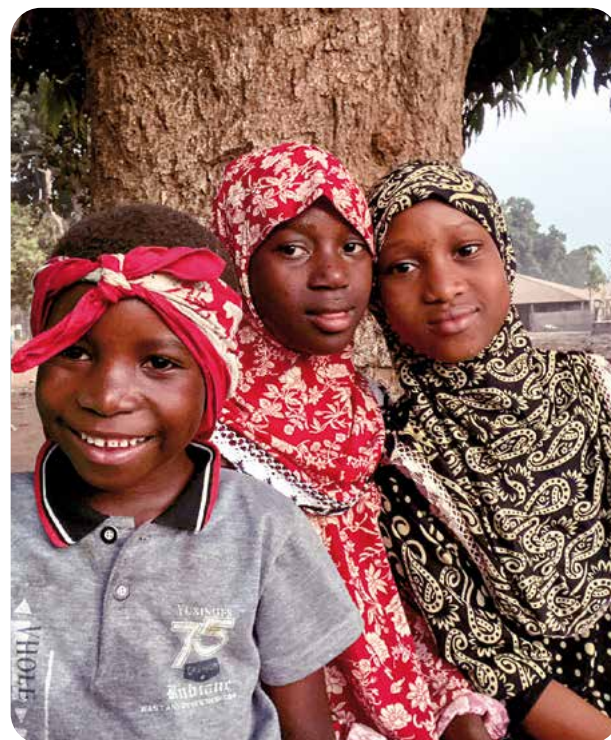

Guinea-Bissau is one of the least developed countries in the world. Life expectancy at birth is just 48 years, and child mortality reaches 150 per 1,000 before the age of five.

The SILO Association has been working with the population of Guinea-Bissau for 17 years, promoting the development of rural communities and carrying out initiatives to improve education, access to healthcare, and nutrition.

In recent years, we have done significant work at the Casa de la Infancia in

Gambasse, supporting children with nutritional problems. Last year, we launched a project to improve conditions at the Gambasse School by upgrading existing classrooms, building two new ones, and refurbishing the kitchen.

This year, we are continuing to improve the school's facilities by constructing an audiovisual classroom, providing 550 books, funding scholarships for vulnerable children, and contributing to teachers' salaries, benefitting a total of 896 children.

Contribution: 12.953€ + 2nd phase 2022: 3.500€

Africa

Construction of a Nursery School

Senegal

With Gune Foundation

The Guné Foundation is committed to supporting comprehensive development processes in Senegal. Its interventions aim to help build a fairer and more compassionate world by facilitating access to basic rights for the most vulnerable people, including food, education, healthcare and nutrition.

The population of the village of Soussoutou lives in a savannah area, far from urban centres, surrounded by grazing land, and without a road network to facilitate travel to health or educational facilities. The village is located 40 kilometres from

the nearest town. It has around 1,000 inhabitants and five classrooms at the local school, only one of which is made of cement — built in collaboration with the Nuria García Foundation in 2020. The remaining classrooms are constructed from straw and reeds.

This is the fifth year we have collaborated with the Guné Foundation, and we have continued to support this community by building another cement classroom to improve the learning conditions for 192 children.

Contribution: 12.505€ + 2nd phase 2022: 8.201€

Latin America

Health and nutrition programme

Cusco

With Amantaní Association

The Amantaní Association has spent 24 years focusing on four residential homes that provide shelter and comprehensive care to babies, children and adolescents without family protection. These children are referred through the Special Protection Unit, Family Courts, Public Prosecutors and the National Police of Peru. State-run centres are extremely limited, making the care of children in situations of family neglect an urgent need. Poverty exacerbates problems such as gender-based violence, sexual abuse, abandonment, child maltreatment,

maternal mortality and more. Since 2019, the Nuria García Foundation has guaranteed and funded healthcare for the babies, children and adolescents living in the Amantaní shelters in Cusco.

The funding covers home visits by a paediatrician, laboratory tests and diagnostics, consultations with specialists and hospital stays, physical therapy, medication, oxygen, eye care, glasses, dental services, and the purchase of balanced nutrition for the care of 47 children.

Contribution: 11.927€ + 2nd phase 2022: 7.486€

Latin America

Health Emergency: support for children and families

Haiti

With Nuestros Pequeños Hermanos Foundation

Haiti has been struck by yet another humanitarian disaster – a 7.2 magnitude earthquake on the Richter scale, with the epicentre located in the south-western region of the country, around 160 kilometres from the capital, Port-au-Prince.

The earthquake on 14 August resulted in more than 2,300 deaths, over 12,000 injuries, and 1.5 million people affected, not to mention the large number of missing persons and the collapse of infrastructure such as schools, hospitals, homes and roads.

With experience in humanitarian emergency programmes, NPH Haiti, together with the Nuria García Foundation, quickly coordinated a response to the earthquake by providing medical care and relief to the civilian population, and distributing essential goods including water and food, medicine, diagnostic tests, diesel and shelter.

Following the emergency response, construction materials were acquired to help rebuild homes for affected families, supporting 600 disadvantaged children.

Contribution: 5.000€ + 2nd phase 2022: 5.000€

Asia

Child Health Improvement Programme

India

With Colores de Calcuta Foundation

The Colores de Calcuta Foundation is committed to human rights and to the development of individuals and communities living in situations of vulnerability, exclusion and poverty, with particular focus on children.

Living conditions in the Pilkhana neighbourhood of Kolkata are extremely harsh: poor infrastructure, families living in shanties or unsafe buildings without electricity, ventilation or running water.

Worsening this situation are high levels of pollution, lack of hygiene, limited access to clean water, malnutrition, and the physically demanding labour many are engaged in, all of which have

serious consequences for health. Public resources are also insufficient — there are only two hospitals serving a population of 4.8 million, and one in every two children suffers from malnutrition. The situation has deteriorated further since the pandemic began in 2020.

The Nuria García Foundation is contributing to the effort to improve the health of 47 children by funding the salary of a paediatrician, a nurse, a physiotherapist, and the medication provided by the paediatric unit over a period of three months.

Contribution: 3.000€ + 2nd phase 2022: 8.000€

Our Impact

Eau my BB

Created with love, Eau my BB is a range of charitable products designed for the little ones. Since its launch in 2017, a percentage of sales has been allocated to health and nutrition projects for children most in need, in collaboration with the Nuria García Foundation.

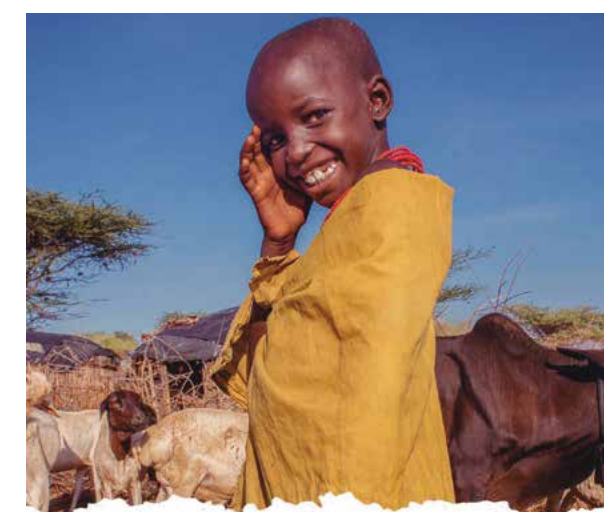

During 2021, a total of €39.045,20 was raised and allocated to: the social support programme for children from single-mother families in Barcelona; the construction and furnishing of a dormitory at Kikaya School in Uganda; infrastructure, nutrition and health improvements at Kakrigu Primary School in Kenya; aid for the health emergency following the earthquake in Haiti; a child health improvement programme in Kolkata; and a shelter in Cusco.
