Foundation's Board Letter

Dear collaborators, partners, donors and volunteers,

It has now been over 10 years since this family project became a reality. Each and every one of the projects we have carried out has filled us with hope and emotion. We hope you feel the same. Our greatest wish is to continue helping all these children who need us so much.

This year, we have continued to support the eight ongoing projects from 2021, in collaboration with Asociación ISTEA, Fundación Teresa Gallifa, Fundación África Digna, Asociación Babies Uganda, Fundación Guné, Asociación SILO, Asociación Amantaní and Fundación Nuestros Pequeños Hermanos.

In addition, we have launched 15 new projects: 11 in the areas of health and nutrition, and 4 focused on education and infrastructure across Europe, Africa, Latin America and Asia, benefitting nearly 3,200 children.

We want to say THANK YOU to all of you. Without your donations, your solidarity purchases and your support, none of these projects would have been possible.

With our warmest wishes,,

Nuria García Foundation's Board

Equine Therapy Programme for Children with ASD

Baix Llobregat
With ISTEA Association

For the third consecutive year, we are funding this project in collaboration with the ISTEA Association, which was created and endorsed by a group of psychologists specialising in ASD who volunteer their time with the organisation. Our role is to support the growing demand from families with children diagnosed with ASD, encouraging awareness and participation.

This programme will take place during the 2022–2023 school year and includes

850 equine-assisted therapy sessions with playful activities that promote the integration of children. The aim is to provide them with tools that support positive development. This year, 50 children aged between 4 and 18 with autism spectrum disorder will benefit from the initiative.

Many of the families with children affected by this type of disorder are living in precarious circumstances and lack the resources to provide them with specialised education.

Contribution: 7.200€ + 2nd phase 2023: 4.800€

Europe

Providing food to the Solidarity Commissary

Barcelona
With Roure Foundation

The year 2022 was particularly difficult, as inflation gave rise to a new kind of poverty. During this period, there was a noticeable increase in the number of families referred by Social Services and organisations working with vulnerable groups, with demand rising by 18 per cent compared to normal conditions. Social Services continued to struggle to meet the need for food donations due to the growing number of families living in precarious situations, including single-parent households and families where both parents are unemployed or without work.

Roure Foundation is an organisation rooted in the historic centre of Barcelona that supports the basic needs of elderly people and families. It offers personalised and comprehensive care to help them become self-sufficient.

This year, for the fifth time, we are supporting their work once again by funding the purchase of dairy products to ensure the continuity of the Solidarity Grocery Programme, benefiting 400 children aged between 0 and 16.

Contribution: 2.000€

Europe

Social care for children from single-mother families

Barcelona

With Teresa Gallifa Foundation

Forty-nine per cent of single-mother families struggle to make ends meet, and this percentage increases with the number of children. Some of these women come from backgrounds of violence and require comprehensive support, including legal advice and emotional counselling. They are often unable to cover the cost of basic necessities such as nappies, clothing or infant formula.

For the third consecutive year, we are continuing our support for the social

inclusion of pregnant women and single mothers, so they can experience motherhood with the support they need.

This project will cover the basic needs of 55 children under the age of five who are living in situations of extreme vulnerability. The assistance includes infant formula, cereals and purées, nappies, hygiene products, and vaccines not covered by the national health system but recommended by the Spanish Paediatric Association.

Contribution: 5.000€ + 2nd phase 2023: 2.500€

Europe

Support for Ukrainian refugees at the border

Ukraine

With Educo Foundation

The ongoing war highlights the urgent need to support all vulnerable children and reminds us of what truly matters: a simple act of kindness, love, and a helping hand is all they need.

The Nuria García Foundation has partnered with the Educo Foundation to support Ukrainian families both in refugee camps along the border and in besieged cities.

Through this project, the Nuria García Foundation funded the supply of food, medicines, and essential items, as well as the provision of psychological first aid for children, and support in organising evacuations from facilities such as hospitals and children's homes.

Contribution: 5.000€

Africa

Nutrition and education of shepherd children

Kenya

With Africa Digna Foundation

We continue to collaborate with the Lchekuti, Child Shepherds programme in Kenya, together with the África Digna Foundation. This project promotes a dignified life for children aged 6 to 16 through impactful educational and nutritional interventions in the Samburu communities of Barsaloi, Lodokume, Lowa, Lulu, Mabati, Nairimirimo, Opiroi and Raraiti. For these communities in northern Kenya, livestock herding is the main economic activity. As these young shepherds spend their entire day working, they do not have the opportunity to attend school and survive solely on milk and tea. As a result, they are unable to read or write, face a high risk of social exclusion, and suffer from significant malnutrition.

We have ensured that the child shepherds in Kenya now have access to two hours of education every weekday, a balanced meal at the end of each class day, and at the end of each school term, parents are invited to review their children's academic progress and share a meal together.

In 2022, the fourth two-year project was completed, supporting 142 children throughout the 2020–2022 academic years. We also launched the fifth phase of the programme, once again taking responsibility for the Lchekuti initiative and supporting 133 children until the end of the 2024 school year.

Africa

Improvements in infrastructure, nutrition and health

Kenya

With Kakrigu Primary School

Kakrigu Primary School is located in Mfangano, an island on Lake Victoria in Kenya. In 2016, it received our full support to fund infrastructure improvements and ensure access to education for 350 primary school children.

On 9 November 2022, a storm caused serious damage to the school's infrastructure. Falling trees destroyed two classrooms and the electrical wiring. As a

temporary solution, the library was used as a classroom, while another class had to be held outdoors under the remaining trees.

Through this new project, we funded the materials and reconstruction of the school's damaged infrastructure, as well as the rewiring of the affected classrooms.

Contribution: 7.200€ + 2nd phase 2023: 7.200€ + 3rd phase 2024: 3.600€

Contribution: 2.453€

Africa

Nutrition programme for children and breastfeeding mothers

Kenya

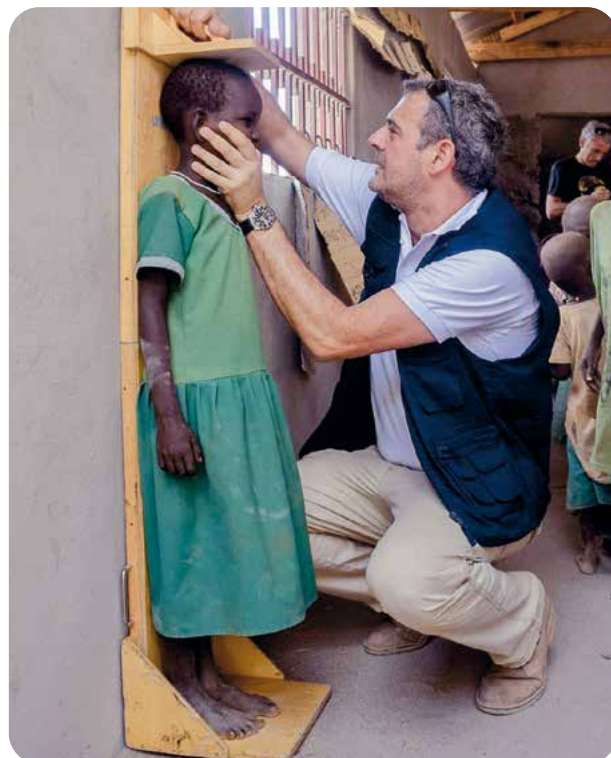

With Aztivate Association

Aztivate is a non-governmental organisation dedicated to the protection and defence of human rights, primarily those related to children's rights. It works through international cooperation, humanitarian aid, CO₂ emissions mitigation, and awareness-raising initiatives focused on human rights and climate change education.

This project aims to uphold the right to quality healthcare for children aged 0 to 6 and breastfeeding mothers, by providing access to comprehensive medical care for the prevention and treatment of malnutrition and other illnesses. Its goal is

to reduce maternal and child mortality in North Turkana County and the border area of Kenya with South Sudan and Ethiopia.

The Nuria García Foundation has funded medical care for 400 children and breastfeeding women through the clinic and mobile unit. The support has also covered case follow-up, the purchase and distribution of therapeutic food, and training workshops for mothers and fathers on response protocols and cultural practices to improve health and nutrition.

Contribution: 4.000€

Africa

Construction and equipment of Kikaya School

Uganda

With Babies Uganda Association

In 2018, we supported the construction of Kikaya School in the Wakiso area in partnership with the association Babies Uganda. The school opened in 2019 with 164 children enrolled, 34 of whom were boarders. By 2020, the new school year began with 300 pupils, 120 of them boarding students. Due to the school's success, this led to the construction of a new dormitory.

The demand for places at Kikaya School was so high that we continued supporting the work of the association to expand the school with a new building housing

four classrooms, creating space for an additional 300 pupils and thereby doubling its capacity. Construction began at the end of 2021 and was completed in January 2023.

Education is the most powerful tool in the fight against poverty and inequality, which is why it is essential to equip the school with the best possible resources. The growing number of students must be matched by an expansion of both facilities and teaching staff in order to provide quality education to as many vulnerable children as possible.

Contribution 1st phase 2021: 4.850€ + 2nd phase 2022: 19.404€

Africa

Food and nutrition programme at Kikaya House

Uganda

With Babies Uganda Association

The association Babies Uganda works to address the harsh reality faced by thousands of Ugandan children, due to broken families, abandonment, the death of their parents, abuse or illness. In addition, they support the progress and development of the wider community, especially in the areas of education and healthcare.

Kikaya House is an orphanage currently home to 30 children, cared for by 6 full-

time carers who look after them 24 hours a day. The household also includes 3 staff members responsible for maintenance and security across the premises.

In recent months, and largely due to the war in Ukraine, inflation in Uganda has caused the price of some food items to double. This new project will ensure complete nutritional support for the 30 children and 9 staff members for an entire year.

Contribution: 4.662,50€ + 2nd phase 2023: 4.662,50€

Africa

CEVIC School, a Ray of Light in the Darkness

Uganda

With Babies Uganda Association

Uganda is a developing country where disability remains a controversial topic for much of the population. There are no social support services, no public awareness campaigns, no access to proper treatments, and no adaptations made in the home.

The Centre for Children with Visual Impairments in Uganda (CEVIC) was founded in 2009 by a Ugandan couple and welcomes all children with this disability, offering them the best possible education. Most of the teachers at the school are themselves blind.

The school is a boarding facility, which means all the children live on site. Most of them come from remote areas, and staying at the school provides them not

only with emotional stability but also the security of regular, nutritious meals.

Babies Uganda has built a new school in the Kikaya area, which will open at the end of January 2023. This new facility has three times the capacity and has been designed to meet all the children's needs. Lessons and hands-on workshops will be offered to foster greater independence.

The Nuria García Foundation, with the support of Tailored Perfumes, will fund the school fees for 50 children during the 2023 academic year (from February to December). This includes all costs related to tuition, boarding, meals and medical care.

Contribution: 10.400€ + 2nd phase 2023: 20.800€

Construction of a Nursery School

Senegal

With Gune Foundation

The Guné Foundation is dedicated to supporting processes of integrated development in Senegal. Its aim is to help build a fairer and more compassionate world by facilitating access to basic rights such as food, education and healthcare for the most vulnerable. Since 2016, we have been collaborating with the Guné Foundation to improve the quality of life for thousands of vulnerable children in Senegal.

The population of the village of Soussoutou lives in a savannah region, far from urban centres, surrounded by grazing land and lacking a road network that would allow

residents to travel easily to health or education services. The nearest town is 40 kilometres away.

With our support, four classrooms have already been built in Senegal. Two of them, along with toilet facilities, were built at the Soussoutou school since 2020. However, the remaining classrooms are still made from straw and reeds.

This year, we are once again funding the construction of a new cement classroom in this village to improve the learning conditions for 229 children.

Contribution: 15.950€ + 2nd phase 2023: 7.000€

Improving the Gambasse school

Guinea-Bissau

With SILO Association

Guinea-Bissau is one of the most underdeveloped countries in the world. Life expectancy at birth is just 48 years, and child mortality reaches 150 per 1,000 before the age of five.

The SILO Association has been working with the people of Guinea-Bissau for 18 years, promoting the development of rural communities and carrying out initiatives to improve education, healthcare access and nutrition. This year, we are once again collaborating with SILO to improve the education of more than 900 children. Our support will contribute to the salaries of

30 teachers, provide scholarships for 10 children, fund the purchase of 250 books and 420 children's exercise books, and cover the acquisition of two computers for the audiovisual room we helped equip in 2021.

In addition, we will support the annual funding of a nurse for the tabancas, where some of the most isolated communities live, and contribute to the maintenance of the medical dispensary and nursing assistants in Gambasse, helping to improve the precarious health conditions faced by the child population.

Contribution: 7.535€ + 2nd phase 2023: 4.035€

Africa

Fight against maternal and child malnutrition

Mozambique

With IBO Foundation

Since 2008, the Ibo Nutritional Support Centre (CANI) has been working in collaboration with the District Health Service (SDS) to reduce child malnutrition through early detection, treatment, individual follow-up and awareness workshops.

The centre provides direct support through two key areas of nutritional care and monitoring. In the first, children under the age of five attend the nutrition programme where they receive fortified porridge. Their mothers learn to cook it using local ingredients and are encouraged to replicate the recipes at home. In the second, milk is distributed to beneficiary infants (either identified by CANI or referred by the District Health Service) to treat malnutrition and address caloric and nutritional deficiencies.

In both cases, a nutritionist is responsible for monitoring the health and progress of each child. On average, children remain in the programme for three months, and mothers take part through cooking demonstrations, hygiene and health workshops, and awareness sessions.

Once again this year, we will allocate funds to support CANI, with the aim of combating maternal and child malnutrition among approximately 350 children over a 12-month period. Our goal is to contribute to the socio-economic development of Ibo and to improving the precarious conditions in which many of its inhabitants live.

Latin America

Health and nutrition programme

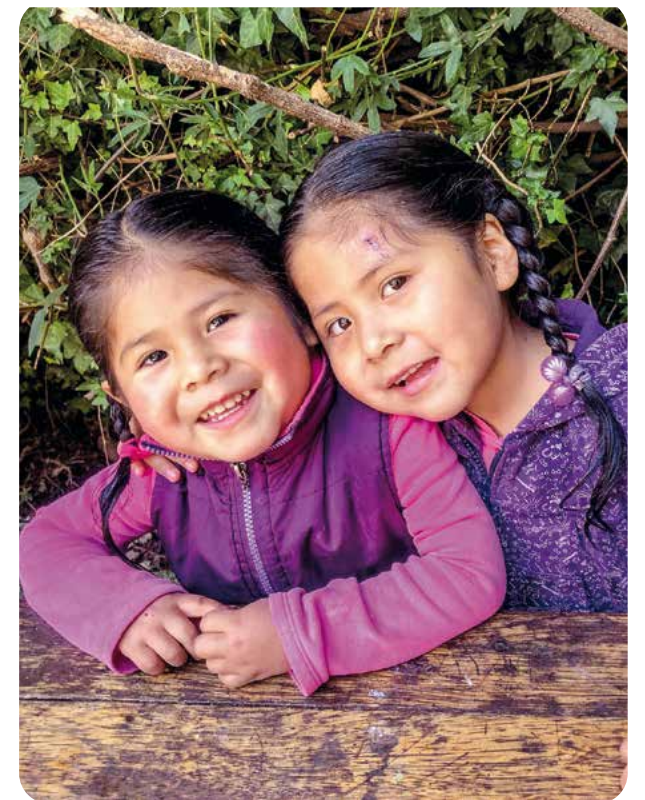

Peru

With Amantani Association

For the past 25 years, the Amantani Association has focused its work on four residential homes that provide comprehensive care and shelter to babies, children and adolescents without family protection. These children are referred through the Special Protection Unit, Family Courts, Public Prosecutors and the National Police of Peru. State-run centres are extremely limited, making the care of children in situations of family vulnerability an urgent need. Poverty further exacerbates problems such as gender-based violence, sexual abuse, abandonment, child maltreatment,

maternal mortality, child labour, addiction issues, and more.

Since 2019, the Nuria García Foundation has ensured healthcare for the babies, children and adolescents housed in the Amantani shelters in Cusco. The funding covers home visits by a paediatrician, laboratory tests and screenings, consultations with specialists and hospital stays, physical therapy, medication, oxygen, eye care, glasses and dental treatment, as well as the purchase of balanced nutrition for the care of 50 children.

Latin America

Health Emergency: support for children and families

Haiti

With Nuestros Pequeños Hermanos Foundation

Haiti was struck by a 7.2 magnitude earthquake on the Richter scale, with the epicentre located in the south-western region of the country, around 160 kilometres from the capital, Port-au-Prince.

The earthquake on 14 August 2021 resulted in more than 2,300 deaths, over 12,000 injuries, and 1.5 million people affected – not counting the large number of missing persons and the widespread destruction of buildings such as schools, hospitals, homes and roads.

With experience in humanitarian emergency programmes, NPH Haiti, together with the Nuria García Foundation, quickly coordinated a response to the earthquake, providing medical care and relief to the civilian population, and distributing essential supplies including water and food, medicine, diagnostic tests, diesel and shelter.

Later, construction materials were acquired to help rebuild homes for affected families, supporting 600 disadvantaged children.

 Contribution 1st phase 2021: 5.000€ + 2nd phase 2022: 5.000€

Latin America

Furnishing of the Community Family Centre

Guatemala

With Nuestros Pequeños Hermanos Foundation

We have once again joined forces with the Nuestros Pequeños Hermanos (NPH) Foundation on a new project to launch the Padre Wasson Community Family Centre, located in a conflict-affected area of Chimaltenango. The centre will provide education, healthcare, nutrition and training services to families in need from the surrounding area.

The renovation of a three-storey building that houses the family centre has now been completed, and a multidisciplinary team of professionals has been hired, specialising in educational psychology, physical and occupational therapy, youth and community development. The Nuria

García Foundation is funding all the centre's equipment.

The beneficiaries of the programme are highly vulnerable children, young people and single-parent families, who will receive academic tutoring and support, shelter, diagnosis, therapy and integration services for children with disabilities, as well as psychosocial and vocational development. A total of 300 people with no resources – mostly indigenous children – will benefit from the programme. These children live in conditions of extreme poverty, without basic sanitation, in violent and dangerous environments, and face food insecurity and malnutrition.

 Contribution: 7.500€ + 2nd phase 2023: 7.500€

Asia

Child Health Improvement Programme

India

With Colores de Calcuta Foundation

The Colores de Calcuta Foundation is committed to human rights and to the development of individuals and communities living in situations of vulnerability, exclusion and poverty, with particular attention to children.

Living conditions in the Pilkhana neighbourhood of Kolkata are extremely harsh: poor infrastructure, families living in shacks or unsafe buildings with substandard housing, without electricity, ventilation or running water.

High levels of pollution, lack of hygiene, limited access to clean water, malnutrition and the physically demanding work many are forced to do also have serious consequences for their health.

Furthermore, existing public resources are insufficient — there are only two hospitals for around 4.8 million people, and one in every two children suffers from malnutrition. This situation has worsened since the pandemic began in 2020.

The Nuria García Foundation is once again supporting a project with the Colores de Calcuta Foundation, improving medical care for 60 children by funding the salaries of a paediatrician, a nurse, a physiotherapist, and the medication provided through the paediatric unit over a 12-month period.

Contribution 8.000€ + 2nd phase 2023: 14.409€

Our Impact

Eau my BB

Created with love, Eau my BB is a range of charitable products designed for the little ones. Since its launch in 2017, a percentage of sales has been allocated to health and nutrition projects for the most vulnerable children, in collaboration with the Nuria García Foundation.

In 2022, a total of €43.560,55 was raised and allocated to: the social support programme for children from single-mother families in Barcelona; the construction and furnishing of a new building with four classrooms at Kikaya School; the provision of food for orphaned children at Kikaya House in Uganda; and the health and nutrition programme at the children's shelters in Cusco, Peru.

Events

Christmas Lottery

As in previous years, we offered Christmas lottery tickets and raised €2,412 for our Foundation's projects!
