FOUNDATION'S BOARD LETTER

Dear partners, donors, collaborators and volunteers,

We would like to begin this Annual Report by expressing, once again, our heartfelt gratitude. Thanks to your trust, support and commitment, the Nuria García Foundation continues to work every day to improve the lives of children living in vulnerable circumstances.

During 2025, we supported 31 projects across 10 countries, working alongside 17 partner organisations and reaching 5,161 children at risk of social exclusion. In total, we allocated €184,342.25 to initiatives focused on health, nutrition and education — key areas in ensuring a dignified upbringing and creating new opportunities for the future.

Behind every figure lies a reality that deserves to be transformed. Each project represents the opportunity to access adequate nutrition, receive medical care, attend school or grow up in a safer and more hopeful environment. These achievements, both large and small, are made possible through the collective efforts of everyone who is part of this Foundation.

We remain committed to the values that inspired our beginnings. The example and legacy of Francisco García continue to guide our work, reminding us of the importance of solidarity and commitment to those who need it most. Likewise, Nuria remains the emotional heart of this Foundation, inspiring us to support children with compassion, sensitivity and humanity.

On behalf of the Board of Trustees of the Nuria García Foundation, we would like to express our sincere appreciation and gratitude for continuing to accompany us on this journey. Every partnership, every donation and every gesture of support makes it possible for us to continue creating opportunities for hundreds of children and their families.

With our deepest gratitude and warmest regards,

Nuria García Foundation's Board

EQUINE THERAPY PROGRAMME FOR CHILDREN WITH ASD

Baix Llobregat

With ISTEA Association

For the past six years, we have been working alongside the ISTEA Association on a programme designed and endorsed by a team of psychologists specialising in Autism Spectrum Disorder (ASD), who volunteer their time in the Baix Llobregat area. Our support focuses on responding to the growing demand from families of children with ASD, promoting their development, independence and social inclusion.

Through recreational activities involving horses, equine-assisted therapy becomes a valuable therapeutic tool that helps improve communication, language skills and social interaction, fostering positive development in a safe and stimulating environment.

During the 2025–2026 academic year, the programme will support 60 children aged between 3 and 14, delivering a total of 1,020 therapy sessions over a period of 10 months.

Due to the specialised nature of these therapies, many families are unable to meet the ongoing costs involved. The Foundation's support is therefore essential in ensuring that children can access and continue receiving this treatment.

Financing: 7.200€ + 2026: 4.800€

PROVIDING FOOD FOR THE SOLIDARITY COMMISSARY

Barcelona

With Roure Foundation

For the past eight years, we have been working with Fundació Roure in support of the Solidarity Food Store, a project that provides vulnerable families with access to balanced and healthy food in a dignified and welcoming environment.

Unlike other assistance-based models, this food store allows families to choose the products they need themselves, fostering autonomy and encouraging their integration into the local community network. In addition, the project offers comprehensive support that addresses a range of social needs, including access to employment, housing and family-work balance.

During this period, particular emphasis has been placed on child nutrition through the monthly purchase of milk and breakfast cereals, essential staples in children's diets, ensuring their continued availability at the food store. In a context of growing economic hardship, an increasing number of families are struggling to meet these basic needs.

Throughout 2025, the project will have supported approximately 1,250 people from 500 family units, including around 385 children. In addition, more than 185,000 kilograms of food will have been distributed, helping to improve families' quality of life and supporting their journey towards greater stability and social inclusion.

Financing: 4.000€ + 2026: 2.000€

SOCIAL CARE FOR CHILDREN FROM SINGLE-MOTHER FAMILIES

Barcelona

With Teresa Gallifa Foundation

For the past six years, we have been working with the Teresa Gallifa Foundation on a project that supports pregnant women and single mothers in vulnerable situations, with the aim of promoting their social inclusion and improving the living conditions of their children.

In addition to meeting basic needs, the project provides comprehensive support to families through psychological assistance, guidance and counselling, helping them to build greater independence and create a more stable future. Many of these women

face economic hardship, limited access to essential resources and, in some cases, situations of violence.

During this period, the basic needs of 228 children under the age of six will be met through the provision of essential items such as infant formula, cereals, baby food, nappies, hygiene products and vaccines not covered by the Spanish National Health System.

Financing: 10.000€ + 2026: 5.000€

HEALTHY NUTRITION FOR CHILDREN WITH MULTIPLE DISABILITIES

Barcelona

With Nexe Foundation

For the past two years, we have been working with NEXE Fundació on a nutrition programme tailored to children with multiple disabilities, with the aim of ensuring that they receive a diet adapted to their specific needs within the educational setting.

Children with multiple disabilities frequently experience swallowing disorders and digestive difficulties, which can lead to nutritional deficiencies, low body weight and other health-related issues. For this reason, the project provides specialised, adapted nutrition that is essential to their well-being and development.

During the 2025–2026 academic year, the programme will benefit 75 children aged between 0 and 6, providing a total of 12,600 adapted meals throughout the year. In addition, it includes workshops and specialised resources designed to improve eating habits and enhance the children's overall quality of life.

Financing: 5.000€ + 2026: 2.500€

SCHOOL MEAL SCHOLARSHIPS: "PACO'S TUESDAYS"

Madrid

With Social Gastronomy Foundation Delegation

In 2025, we concluded our collaboration with the Social Gastronomy Foundation's local branch in the La Concepción district of Madrid, a project aimed at ensuring access to adequate nutrition for children in vulnerable situations who do not qualify for full school meal grants.

Through this initiative, children were provided with a weekly meal in a warm and welcoming environment, recreating the atmosphere of a family meal. The programme supported 65 children aged between 3 and 14, referred

by local state schools, helping to improve their nutrition, well-being and social support. Beyond meeting nutritional needs, this space became a source of support and guidance for both the children and their families, offering stability, care and a sense of community in a context of economic hardship.

Financing 2024: 5.070€ + 2025: 5.070€

COMPASS PROJECT "PACO'S TUESDAYS"

Sant Feliu de Llobregat

With Càritas Diocesana

In 2025, we launched a new partnership with Càritas Diocesana through the Compass Project – "Paco's Tuesdays", named in tribute to our beloved President and Founder, Francisco García. This initiative was created to provide educational support and guidance to vulnerable young people outside school hours.

The project offers a safe and supportive environment where adolescents receive academic assistance, develop healthy habits and strengthen their personal and social skills under the guidance of educational professionals. In addition, participants are provided with a balanced meal during each session, helping to meet

a basic need for many of the young people involved.

Aimed at adolescents aged 13 to 16 who are experiencing vulnerability, the programme combines three key areas: nutrition, educational support and personal development. By doing so, it promotes independence, responsibility and emotional well-being during a particularly important stage of growth. The programme is delivered in coordination with local social services and educational centres, creating a support network that facilitates the identification and ongoing assistance of young people at risk of social exclusion.

Financing: 1.500€ + 2026: 1.500€

NUTRITION AND EDUCATION FOR CHILD HERDERS

Kenya

With Africa Digna Foundation

We have been working with the África Digna Foundation for the past seven years on a programme that promotes a dignified life for child herders from the Samburu community in northern Kenya, providing them with access to education and adequate nutrition.

The project offers two hours of tailored education each day, alongside a balanced meal, to children aged between 6 and 16 who, due to their cultural context, spend much of their time herding livestock and are therefore unable to access the formal education system.

During this period, we support the operation of three educational centres in **Lodokume, Lwa and Lulu**, directly benefiting 110 children. In addition, the programme encourages educational continuity and creates new opportunities for the future, enabling some pupils to subsequently enrol in primary school.

Financing: 9.886,50€ + 2026: 5.207€

SAMBURU MENSTRUAL HYGIENE PROJECT

Kenya

With Africa Digna Foundation

We continue our collaboration with the África Digna Foundation through a programme that promotes access to dignified menstrual hygiene for girls and young women from the Samburu community in northern Kenya.

Limited access to resources and a lack of information about menstrual health contribute to school absenteeism and restrict the development opportunities of many girls, while also perpetuating social and cultural stigma. To address this reality, the project combines the distribution of reusable menstrual hygiene kits with

educational workshops and awareness-raising activities aimed at girls, communities and schools.

During the 2025–2026 period, the programme will benefit 358 girls, expanding its reach to new communities and strengthening menstrual health education. In addition, it supports the training of local facilitators and encourages the involvement of schools and health centres, with the aim of ensuring the project's long-term continuity and sustainability.

Financing: 5.164€

FOOD AND NUTRITION IN KIKAYA HOUSE

Uganda

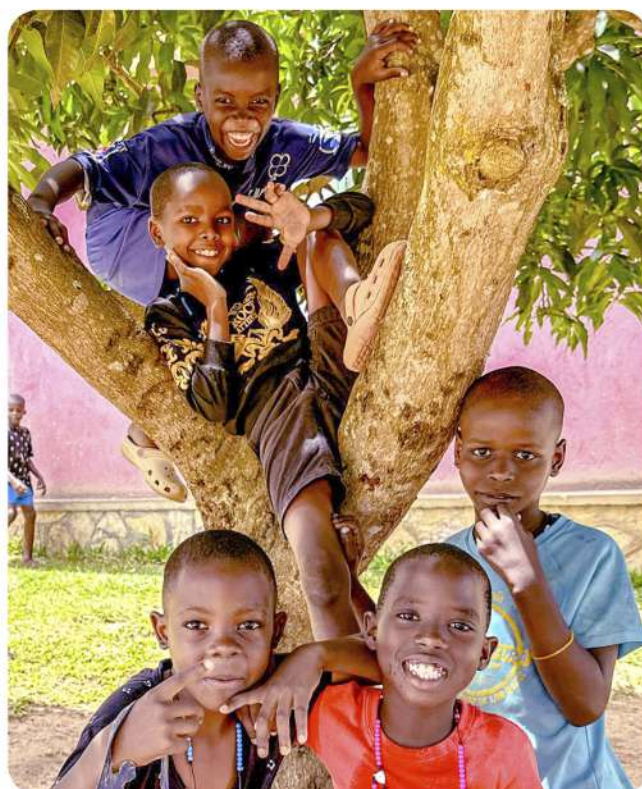

With Babies Uganda Association

After four years of collaboration, in 2025 we concluded our support for the nutrition and feeding programme carried out in partnership with Babies Uganda Association at Kikaya House, a home that provides care for children who have been abandoned, orphaned or are living in situations of extreme vulnerability.

Through this initiative, the full nutritional needs of 32 resident children were met, alongside support for the seven caregivers and staff members responsible for their daily care, ensuring adequate nutrition within a safe and stable environment.

Beyond providing food, the project contributed to the children's overall well-being, supporting their physical and emotional development while offering them a consistent environment of protection, care and guidance.

As this chapter comes to a close, we reaffirm our commitment to supporting initiatives that guarantee access to adequate nutrition and a dignified environment for the most vulnerable children.

Financing 2024: 9.325€ + 2025: 4.662,50€

SCHOOLING FOR CHILDREN WITH VISUAL DISABILITIES

Uganda

With Babies Uganda Association

We have been working with Babies Uganda Association for the past five years in support of CEVIC, an educational centre specialising in the care and education of children with visual impairments in Uganda.

In a context where disability remains a taboo subject and access to specialised resources is limited, this project provides tailored education that combines Braille literacy, assistive technology and life skills training, promoting students' independence and inclusion.

During this period, the programme will support 50 children, providing access to education, nutrition, healthcare and comprehensive care. In addition, the project encourages educational continuity, enabling some students to progress to secondary education.

Thanks to this intervention, the children develop greater independence, confidence and personal skills, significantly improving their future opportunities within a more inclusive environment.

Financing: 30.800€ + 2026: 20.000€

CONSTRUCTION OF A SCHOOL IN SARÉ MAOUNDÉ

Senegal

With Gune Foundation

In 2025, we completed the project launched in partnership with the Guné Foundation to build a nursery classroom in the village of Saré Maoundé, Senegal, addressing an urgent need for educational infrastructure in a rural area with very limited resources.

The project replaced temporary classrooms built from fragile materials with a permanent concrete facility that provides a safer, more durable and more suitable environment for learning. This improvement directly benefits 160 boys and girls aged between 11 and 14 from Saré Maoundé and neighbouring villages.

Thanks to this intervention, pupils now have access to a more dignified and protected learning environment, sheltered from extreme heat and the rainy season. This has helped to improve school attendance, support educational continuity and provide better conditions for learning.

Financing 2024: 7.374,50€ + 2025: 7.374,50€

RENOVATION OF THE PRIMARY SCHOOL IN DIAOBÉ

Senegal

With Gune Foundation

Our collaboration with the Guné Foundation now spans nine years of supporting educational projects in Senegal, promoting access to quality education for children living in vulnerable circumstances.

On this occasion, the project focused on the renovation of a primary school building comprising four classrooms used by more than 500 children aged between 5 and 7. The facilities, originally built in the 1990s, had suffered significant structural deterioration, compromising the safety of both pupils and teaching staff.

The refurbishment works, completed as planned, have restored a safe, accessible and suitable learning environment. Improvements included structural repairs, the installation of doors and windows, upgraded flooring and the general refurbishment of the classrooms.

This intervention builds on the work carried out in the area in previous years, strengthening the local education system while also benefiting surrounding communities.

Financing: 7.804€ + 2026: 15.606€

EDUCATIONAL IMPROVEMENTS IN GAMBASSE

Guinea-Bissau

With SILO Association

Our collaboration with SILO Association now spans nine years of supporting educational and social projects in rural communities across Guinea-Bissau, one of the poorest countries in the world.

The project aims to improve conditions at Gambasse School, supporting the operation of the centre and ensuring access to quality education for more than 800 children. To achieve this, the programme contributes towards the salaries of 33 teachers, provides scholarships for pupils in vulnerable situations, and supplies school materials, books and educational resources.

In addition, the project includes the provision of refurbished computers to improve access to digital learning tools, as well as support for the local health clinic through the funding of healthcare staff salaries for several months, thereby strengthening access to medical care within the community.

Financing: 17.616€ + 2026: 8.908€

MATERNAL AND BABY NUTRITION PROGRAMME

Mozambique

With IBO Foundation

Our collaboration with the IBO Foundation now marks four years of supporting programmes to combat child malnutrition in the Ibo region of Mozambique, an area particularly affected by food insecurity and population displacement.

The project aims to prevent, identify and treat malnutrition among children under the age of five, addressing both its causes and consequences through a comprehensive approach that combines nutritional care, medical monitoring and community education.

During this period, the programme will support 350 children through a nutritional treatment based on locally sourced products, complemented by workshops for mothers on nutrition, hygiene and health.

As a new development this year, the project includes funding for a local nutritionist, a key role in ensuring the monitoring, continuity and effectiveness of the programme, thereby strengthening its long-term impact and sustainability within the community.

Financing: 15.300€ + 2026: 13.725€

NO MORE CATARACTS FOR KIDS PROGRAMME

13 surgical expeditions in Africa and Latin America

With Elena Barraquer Foundation

Our collaboration with the Elena Barraquer Foundation continues for another year through support for the #NoMoreCataracts4Kids programme, an initiative that aims to restore sight to children with cataracts in Africa and Latin America, directly improving their quality of life and future opportunities.

If left untreated, childhood cataracts can lead to irreversible blindness, hindering children's development and preventing them from accessing education. However, with timely surgical intervention, sight can be restored, completely transforming their lives.

The project plans to perform 125 cataract surgeries on children aged between 5 and 16 over an eight-month period, through specialised surgical expeditions that enable diagnosis, treatment and follow-up care in resource-limited settings.

Beyond the medical intervention itself, the programme's impact also extends to families and communities, promoting children's independence and enabling them to continue their educational and social development.

Financing: 10.017€

IMPROVING HEALTH AND NUTRITION IN FOSTER HOMES

Peru

With Amantaní Association

Our collaboration with Amantaní Association now spans seven years of supporting healthcare and nutrition programmes for babies, children and adolescents living in situations of family neglect and vulnerability in Cusco, Peru.

The project is carried out in residential care centres, where children receive comprehensive support that addresses their basic healthcare needs through paediatric consultations, medical examinations, specialised treatments and ongoing monitoring. In addition, they are provided with balanced and adapted nutrition, including specialised diets tailored to each child's individual needs.

Many of these children come from extremely vulnerable backgrounds marked by abandonment, violence or poverty. As a result, the programme not only addresses their physical health but also contributes to their emotional recovery and overall well-being.

During this period, the project will support 50 children, ensuring continuous medical and nutritional care that significantly improves their quality of life and their opportunities for healthy development.

Financing: 13.880€ + 2026: 6.940€

HEALTH AND NUTRITION AT "CASA SAN ANDRÉS"

Guatemala

With Nuestros Pequeños Hermanos Foundation

Our collaboration with the Nuestros Pequeños Hermanos Foundation now spans nine years of supporting the health and nutrition programme at Casa San Andrés, a residential home that provides care for vulnerable children and adolescents in Guatemala.

The project ensures access to balanced nutrition and comprehensive healthcare for children living in residential care, many of whom have special needs or disabilities. In addition, it provides access to medical treatment, psychological support and essential healthcare services that contribute to their well-being and development.

During this period, the programme will benefit 89 children through its nutrition component and provide residential care for 46 children and young people aged between 0 and 18, of whom 16 have a disability, ensuring their care and well-being within a safe and protective environment.

Beyond meeting basic needs, Casa San Andrés offers a stable and nurturing environment where children receive ongoing support and opportunities for personal development, helping to improve their quality of life and enabling them to grow up in dignified conditions.

Financing: 10.000€ + 2026: 5.000€

NIGHT-TIME MOBILE MEDICAL UNIT.

India

With Colores de Calcuta Foundation

We launched a new partnership with the Colours of Calcutta Foundation through the Night-Time Mobile Medical Unit, a project that brings healthcare services directly to children and families living in Kolkata's slum communities, where access to medical care is virtually non-existent.

The programme operates through a mobile clinic that visits communities several nights a week, providing direct medical consultations, medication and basic treatments within the neighbourhoods themselves. Cases requiring more specialised care are referred to the designated hospital or other healthcare facilities, ensuring appropriate follow-up and continuity of care.

The intervention focuses particularly on the most vulnerable children, reaching approximately 3,400 children within a total beneficiary population of 10,000 people across at least ten slum communities in the city, where living conditions are especially challenging and limited access to basic services exacerbates health problems.

During 2025, the programme has already provided care to nearly 1,950 children and adolescents in its first months of operation, while also covering hospital admissions and surgical procedures in the most serious cases.

Financing: 9.600€

CHAN FAMILY

EMPOWERING INDIGENOUS GIRLS

Nepal

With Bahadur Social Project Association

We continue our collaboration with Bahadur Social Project Association through the third joint project we are developing in Nepal, focused on empowering indigenous girls and young women and promoting gender equality, as well as access to basic health and educational opportunities.

The project aims to improve the health, dignity and development opportunities of 320 girls through the distribution of school uniforms and menstrual hygiene kits, encouraging regular school attendance and helping to reduce absenteeism.

These kits include hygiene products, reusable sanitary pads, underwear, a hot

water bottle, a thermometer and basic medicines, covering essential needs that many families are unable to afford.

In addition, the programme provides first aid training and health education, equipping young women with practical tools to support their self-care and well-being.

With a duration of 12 months, the project also helps to challenge cultural stigmas associated with menstruation while strengthening girls' confidence, independence and participation within their educational and social environments.

Financing: 6.835,50€ + 2026: 3.451,50€

A DIGNIFIED LIFE FOR SANTHALI CHILDREN

India

With Kambia Foundation

In 2025, we launched a new partnership with the Kambia Foundation through a comprehensive programme aimed at supporting children and families from the Santhali tribal community on Sagar Island, India, in a context marked by vulnerability and social exclusion.

The programme seeks to ensure access to education, healthcare, legal documentation and child protection services, addressing the main barriers that hinder children's development through an integrated

approach. Many of these families live in conditions of extreme hardship, with unstable incomes and limited access to basic services or the legal documentation required to exercise their fundamental rights.

During this period, the project will benefit 235 children, strengthening an established intervention model that promotes educational reintegration, community empowerment and improved living conditions for families.

Financing: 2.632,25€ + 2026: 7.896,75€

OUR IMPACT

Eau my BB

Created with love, Eau my BB is a range of charitable products designed for the little ones. Since its launch in 2017, a percentage of sales has been allocated to child health and nutrition projects for the most vulnerable, in collaboration with the Nuria García Foundation.

In 2024, a total of **€39.016** was raised and allocated to: the social support programme for children from single-mother families in Barcelona; food provision for orphaned children at Kikaya House in Uganda; the maternal and child nutrition project in Mozambique; the health and nutrition programme for foster homes in Cusco, Peru; and the mobile maternal and child health unit in Kolkata, India.

EVENTS

Christmas Lottery

Like every year we've offered the Christmas lottery and we have raised **2.034€** for our Foundation projects!
